JANUARY 1957-66

-DEC.

### New Motor Vehicle Sales

New motor vehicle sales showed increases of over 50% in January 1957 compared with January of 1956. Passenger cars led the advance with records for the month of January with 26,540 units sold for \$77,908,080, gains of 57.4% and 62.9% respectively over last year.

Commercial vehicle sales advanced 35.6% in number and 44.0% in value. The \$22,986,000 commercial vehicle sales were higher than any other January although the 6,037 units sold were below the record for the month established in 1951.

Significant gains occurred in the two most easterly provinces and in Saskatchewan and Alberta. During January there were 19 buses sold for \$330,000. These are included in the commercial vehicle category.

### Note:

Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.

The financing shown herein represents only that business done by sales finance and acceptance companies engaged in the purchase or discounting of notes receivable arising from retail instalment sales of new and used motor vehicles.

Financing of Motor Vehicle Sales

New Vehicles

There were 10,498 new passenger cars financed in January for \$23,345,000, greater than 1956 by over 30% and a record for the month of January in both units and amount of financing.

Substantial gains in commercial vehicle financing brought the total to \$7,883,000 in January 1957, another record for any January and an amount almost 50% above last year. The 2,291 units financed were second only to the 2,701 commercial units financed in January 1952.

Used Vehicles

Financing of used vehicles was more in line with former years; January 1957 showed nominal gains over a year ago in passenger car financing and decreases in units and amount of financing of commercial vehicles. The 10% increase in the amount of passenger car financing brought the total to \$18,851,000 for January 1957, an amount greater than any other January for this item.

## NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

### FEBRUARY 1957

#### New Passenger Car Sales

Sales of new passenger cars increased 14 per cent in February to 26,529 units from 23,290 a year ago but fell short of the record number (30,282) sold in February 1953. The value of sales, however, advanced 17 per cent in the same period to \$78,208,000 from \$67,061,000 and outranked the previous high of \$76,212,000 reached in 1953.

Sales of new commercial vehicles numbered 5,742 and were valued at \$20,597,000. Both figures accounted for a rise of 9 per cent over February 1956. The amount of sales was higher than that of any previous February, but, as for new passenger cars, the number sold was much below that of February 1953 when a record 8,246 units were sold. Included with the figures for commercial vehicles above were 19 buses valued at \$411,000.

#### Note:

Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.

Financing of Motor Vehicle Sales

New Vehicles

In February 1957 more new passenger cars were financed by sales finance and acceptance companies and for a greater value than in any previous February. New passenger car sales financing totalled 10,260 units and \$22,729,000 in amount. These figures were respectively 17 and 19 per cent greater than the 8,775 new vehicles which were financed to the extent of \$19,120,000 in February a year ago.

Commercial vehicles sales financing in February this year advanced 28 per cent in number to 2,045 from 1,593 a year ago. The amount of financing rose 33 per cent to \$6,536,000 from \$4,901,000 over the same period. The amount financed was the highest for any February on record while the number came third after 1952 and 1953.

Used Vehicles

The financing of sales of used passenger cars and commercial vehicles declined 4 per cent in number from the previous year with 25,899 units (26,902 in 1956). The amount financed, however, increased 4 per cent over the same period from \$23,995,000 to \$24,960,000.

## NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

MARCH 1957

New Motor Vehicle Sales

Sales of new motor vehicles in the first quarter of 1957 advanced 18 per cent in number to 110,181 units from 93,189 last year and 21 per cent in value to \$337,299,000 from \$278,038,000.

The 38,193 new passenger cars sold in March this year came second to 1953 when 39,607 vehicles were sold, and 4 per cent above the March 1956 total of 36,556; the value of sales at \$110,307,000, however, was 7 per cent greater than the record high established in March a year ago with \$102,916,000. Commercial vehicle sales totalled 7,140 units and retailed for \$27,293,000, respectively 5 and 8 per cent above the 6,783 units sold for \$25,356,000 in March 1956. Although the value of sales of new commercial vehicles in March reached a new peak, the number of units sold was the third lowest, after 1955 and 1956, in the last eight years. Included in the above figures for commercial vehicles were 86 new buses which were valued at \$1,833,000.

Note:

Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.

## NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

APRIL 1957

New Motor Vehicle Sales

Sales of new passenger cars in April declined 7 per cent in number to 46,045 from 49,757 in April 1956 and 5 per cent in amount to \$131,060,000 from \$137,505,000. Provincially, the percentage changes in number sold covered a wide range with Newfoundland registering the largest decrease (46 per cent) and Saskatchewan the largest increase (43 per cent). In addition to Saskatchewan, increases were registered for Quebec (6 per cent), Manitoba (19 per cent) and Alberta (14 per cent) but these were not substantial enough to offset the declines in the other provinces.

Sales of commercial vehicles in April increased 4 per cent in both number and amount to 9,013 units valued at \$33,185,000 as against 8,697 units valued at \$31,754,000 in April 1956. All the provinces east of Ontario showed decreased sales while Ontario and the western provinces showed increases over their 1956 levels. The above figures include 116 buses valued at \$3,228,000.

Notes:

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

JUNE 1957

New Motor Vehicle Sales

New motor vehicle sales were lower in June this year, continuing the decline from 1956 sales evidenced in recent months. All sales, passenger and commercial units and dollar value, were approximately 20 per cent below the level of June 1956. British Columbia showed the smallest decrease in new passenger car units sold (4.2 per cent) while other provinces experienced more severe cut-backs to a low of 43.9 per cent in Prince Edward Island. Decreases in retail sales were arrayed in much the same order.

Commercial vehicle sales in June were approximately 21 per cent lower in both number and value with Saskatchewan showing the smallest loss in unit sales. The 7,563 vehicles sold included 65 buses valued at \$1,293,000.

Year-to-date decreases of new vehicle sales were more nominal, except that European passenger car sales were much above the sales of the first six months of 1956.

Note:

Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.

Industry and Merchandising Division.

### Financing of Motor Vehicle Sales

#### New Vehicles

As would be expected, financing of new car sales in June closely paralleled sales, with declines in the neighbourhood of 20 per cent. There was a more erratic pattern by provinces. New passenger car financing totalled \$37,139,000, representing a range from +6.6 per cent in Manitoba to -32.1 per cent in Ontario.

Commercial vehicle financing covered 2,903 vehicles with a financed value of \$10,356,000, decreases from 1956 of 22.9 per cent and 18.8 per cent respectively.

#### Used Vehicles

Financing of used vehicles did not drop as severely as did new vehicles. In total, the \$40,297,000 financed value was 3.7 per cent below the June 1956 level; only Ontario and the Atlantic Provinces showed declines, while gains in the other provinces ranged up to 20.9 per cent for Manitoba.

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

JULY 1957

New Motor Vehicle Sales

July sales of new motor vehicles totalled 41,803 units valued at \$122,430,000, down 19 per cent in number and 17 per cent in value from July 1956 when 51,564 units were sold for \$147,728,000.

New passenger car sales decreased 17 per cent in number to 34,939 from 42,227 in July last year and 14 per cent in amount to \$98,572,000, from \$114,832,000. Except for the province of Quebec which registered a 2 per cent gain in number sold, sales were down in all regions but chiefly in British Columbia (36 per cent), Ontario (26 per cent) and Newfoundland (21 per cent).

New commercial vehicle sales fell 26 per cent in number and 27 per cent in value to 6,864 units valued at \$23,858,000 from 9,337 units valued at \$32,896,000 a year ago. The number of new commercial vehicles sold in Newfoundland was considerably higher than last year and accounted for a rise of 82 per cent. However, sales were down substantially in all the other regions with the smallest decline (13 per cent) being registered for Alberta. Included in the above figures were 47 buses valued at \$745,000.

Sales of new passenger cars for the year to July 31 were down 6 per cent in number and 3 per cent in value as compared with the same period of 1956 while sales of new commercial vehicles declined 7 and 5 per cent respectively.

Note: Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.

Retail values quoted in this report are based on the retail price to individual purchasers at the Canadian point of manufacture. In the case of imported vehicles, the values are the retail price delivered at the nearest Canadian distributing centre. Retail values include sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Transportation charges from Canadian point of manufacture to point of delivery are not included.
